Allowable Subject Matter

1. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 1-9, 11-19, 21-29, and 31-34 are found to be in condition for allowance.

Reasons for Allowance

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a method for adapting a transmission sequence comprising the steps of determining which of a fine granular scalability encoded macroblocks in each of bit planes is associated with a desired portion of a video image, determining an order of transmission of the determined fine granular scalability encoded macroblocks using a predetermined transmission sequence, and advancing the determined fine granular scalability encoded macroblocks in the order of transmission according to a known level of enhancement.

It is noted that the closest prior art of record Leiper (US Patent no. 6112234) teaches a similar transmission method, however, Leiper fails to particularly teach or suggest *"determining an order of transmission of a determined fine granular scalability encoded macroblocks using a predetermined transmission sequence, and advancing*

the determined fine granular scalability encoded macroblocks in the order of transmission according to a known level of enhancement." as specified in the claims.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance".
